

## Ease Pain, Headache in Few Minutes

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatisms, neuralgia... the fastest safe relief, it is said, yet discovered. Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking. The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly as you swallow it. And this is ready to do work almost instantly.

MADE IN CANADA

Does Not Harm the Heart

## A Time For Thought

Winter approaches and the year progresses steadily to its close. The major activities of this great western agricultural land are rapidly being completed for another season. The hours of daylight are becoming fewer, the days shorter, and the evenings and hours of darkness longer. As Nature thus works out its annual changes, man, too, alters the routine of his life. As his activities on the land become lighter, he rises later in the morning and retires to rest later in the evening. And he employs those evening hours in ways not possible to him when physically tired out from a long day's labor in the fields.

In the late Fall and Winter months thousands of people in Western Canada devote themselves to reading, to study, to forms of recreation, to community gatherings, which are not possible during the strenuous months of plowing, seeding, harvesting and threshing. The Fall and Winter becomes the time for self-improvement, for checking up of oneself, for planning for the future.

Possibly, because of the very nature of the times through which the world is now passing, with a multitude of, as yet, unsolved problems; because of difficulties to be overcome which are taxing the resourcefulness and testing the courage of everybody; because of the danger of feelings of despair, of hopelessness and faith, because of such a world condition it is probable that people will do even more thinking and study than in times past.

Unquestionably people are thinking, perhaps as they never thought before. Admittedly, there is much loose thinking, reckless thinking, by some. There are others who, perhaps, imagine they are doing some real thinking but who, in reality, are allowing others to think for them and are merely adopting the thinking of others. But many others, probably the vast majority of people, are thinking for themselves, thinking seriously, and earnestly studying and working to do so in even more earnest, serious fashion during the next few months.

Few investments, says one writer, are so sure and profitable as the effort to equip oneself in the four fundamental accomplishments:

1. How to think accurately and comprehensively.
2. How to express thought in talking and writing.
3. How to work skilfully with the hands.
4. How to take one's place among men.

The next four or five months will provide a golden opportunity for many of us to make such investments. As we read a newspaper, magazine or book, and obtain entertainment therefrom, the opportunity is likewise ours to think up for ourselves the wisdom or foolishness of the thought expressed or ideas advanced by the writer for the time being engaging our attention. It is an opportunity to test the accuracy and comprehensiveness of our own thinking.

Or, as we listen to some speaker over the radio, to an eminent clergyman, a man well known in public life, an outstanding figure in the financial or industrial world, a great scientist, inventor, traveler, author, or social worker, and as we glean information, and hear definite opinions advanced, we, of course, advance our knowledge and are entertained. But we will have missed a real opportunity for self-advancement if, at the same time, we fail to ponder over and analyze what we hear, and bring our own thinking apparatus into full play, and apply the test of our own serious, concentrated thought, to the speaker's message and the ideas advanced.

It is well to be a good listener, a constant reader, but it is better to be a student. Let us absorb from others; in that way information is gained and knowledge advanced. But let us be something more than a sponge which merely absorbs. Let us train ourselves to sift the true from the false; the good from the evil; that which is strong from that which is weak; selecting that which is constructive from that which is purely destructive.

There is much to criticize these days, and destructive criticism is about the easiest thing in which any person can indulge. But there is also much to commend and applaud. War with all its horrors and suffering is to be condemned—condemned as the peoples of the world have not yet seen fit to condemn it—but even in the days of war there was nevertheless developed attributes of character of the finest and noblest type. The present economic depression is a world tragedy. Its evils must be mitigated, and a repetition of it prevented. It is a tragedy because it is a preventable thing, and one which man alone has not yet completely controlled. But out of the depression there is slowly but surely arising a greater conception of man's relations, duties and responsibilities to his fellow man.

There is a better way of life for every individual, for every community and nation, for the world. It will be brought about, and the new era ushered in, not by one great conquest, or the man or woman who does his own God-given work, and the equally rapid substitution of something else, not by the efforts of any one man, or party, or nation, but by the individual efforts of all combining to one great common end. The man or woman who does his own God-given work, deep, serious thinking, and who applies their own God-given powers and energies to the particular task which confronts them, will be the real leader in the new era; the new era is being made.

Now is the time for every person to fit himself or herself for the great work now at hand and ahead.

## London's New Lighting Scheme

Famous Buildings Will Be Flood-Lighted On Certain Occasions

Canadian visitors to London this winter will find a much less gloomy place than they have been led to expect, since Douglas Webster, London Correspondent of the Regina Leader-Post. A lighting scheme has been planned and will be carried out this winter which will rid London of its reputation of a city of dark and gloomy places.

Famous buildings such as the clock tower of the Houses of Parliament, the National Gallery, Westminster Abbey, and St. Paul's Cathedral will be wired for floodlighting and illuminated at certain times.

The London society has the plans in hand. Its intention is to flood-light certain buildings frequently and especially on such days as have national significance. The cost will be borne privately.

The project was first mooted by the Incorporated Association of Architects and Surveyors some three years ago. Nothing came of it then. Today the London Society has the matter well in hand and it is hoped that the first display of floodlighting under the society's auspices will coincide with the British Industries Fair which takes place in 1934.

Although this floodlighting is designed to boost the Industries Fair the scheme will not stop there. The Royal Society intends to make it a permanent feature of the London season.

## DEPRESSED BY ACUTE ACIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as in this woman's case.

"I suffered for many years from acidity in various forms," she writes. "At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits. I tried Kruschen Salts, and the effect was magical. The pain subsided and the depression lifted like a cloud. I have taken the daily dose of Kruschen ever since. That was about five years ago, and the Kruschen does not lose its effect." (Miss E.M.H. Kruschen is a 50 effective with acidity because it neutralizes acid, takes all the toxins out of it, and gently expels it from the system. And by stimulating your organs of elimination to perform their duty, Kruschen will prevent this harmful acid from ever accumulating again. After that you'll experience no more misery after meals.)

## Report Col. Fawcett is Alive

British Explorer And His Son, Missing Eight Years, Said To Be Held Prisoners

Reports were received at Rio de Janeiro, that the British explorer, Colonel H. F. Fawcett, and his son, who have been missing eight years, are alive in the jungle.

A despatch from Cuyad, Matto Grosso, to the newspaper "Annoite," quoted Arao Bezerra, a planter in Paranaatinga, as saying that an Indian woman told him two white men were being held prisoners by Culucri Indians in the Xingu district, a 45-day journey from Paranaatinga.

Similar reports have not been confirmed.

## Good Way To Stop Acid Stomach

Any druggist will tell you the best way to stop acid stomach and indigestion is to take a little Bismarck Magness in water after meals. This will stop your indigestion and sweeten the stomach, get rid of gas and belching in no time. Ask any druggist.

## Barter In Natural History

Barter has been winning its way into all departments of life in Great Britain as well as elsewhere and now has entered the realm of natural history. A number of moths, the first of their species caught in England, have been exchanged by the museum at Hull with a natural history museum for a whale.

Salary cuts in salaries of employees of West Sussex County, England, made in 1931, have just been restored.

W. N. U. 1016

## Japan's Activities In Pacific

Writer Claims Japan Intends To Put U.S. Out Of The Picture

"Japan is now definitely and methodically preparing to put the United States out of the west Pacific picture by force, as she did Russia in 1904," said Upton Close, author and lecturer, who passed through Victoria after a trip to Japan and Hawaii.

"When President Roosevelt authorized resumption of building of the United States navy, the Japanese gave up hope of bluffing and persuading the people of the U.S. to withdraw from the Pacific," he said. "Japan now means business."

The author said he was banned from Manchukuo because of his criticism of Japanese activities in that state.

"The Japanese people, who have been propagandized to the point where they will now not permit any ruling clique to abandon the campaign for domination of China and the Pacific," he asserted, "It was high time the people of North America ceased to be deluded by Japanese Government officials who declared war with the U.S. was 'unthinkable.'"

## Foresee Maritime Towns Moored In Atlantic

Forerunner Of Many Others Likely To Rise In North Sea

A vast uncharted island, forerunner of many others which will give to the world a new race of island dwellers, is said by a Berlin correspondent likely to rise shortly in the North Sea. A line in the near future has been visualized, when there will be maritime towns moored in the middle of the Atlantic and complete with luxury hotels and bathing grounds for aircraft, airship, services will be begun from the mainland and in between the island communities, aerodromes, with powerful wireless stations, will be built. Then will come the health seekers. Week-enders will discover the new world on their doorstep. The islands will have their trees, flowers and gardens. The sea will be harnessed to provide electricity, and the waste of the communities will be applied by cargo carrying aircraft from the mainland.

## More Work Under N.R.A.

Expect One Million Or More Have Been Re-Employed

Possibility that the count now being plotted in the United States by the N.R.A. may show re-employment of 1,000,000 or more persons in excess of present estimates is being held out by statisticians to Hugh S. Johnson, the administrator.

They have calculated that the actual count of noses by direct solicitation will reach tens of thousands of employers who do not report regularly through ordinary channels and may show that between 4,000,000 and 5,000,000 persons have found work since the low mark of last winter. The present accepted figures, based largely upon reports to the labor department by industry and upon trade union estimates, put at approximately 2,500,000.

## An Unusual Concert

Glee Club In England Composed Entirely Of Grandfathers

Grandfathers formed a Glee Club and gave a concert in Lambeth, England, recently. Nine grandfathers sang, one grandfather played the accompaniment and the "call boy" was a grandfather aged 74. Younger members of the audience and grandmothers helped with choruses of such songs as "50 years ago as 'Daring Mabel,'" "Running Up and Down Stairs" and "The Girl in the Pinafore Dress."

Several splendid, gladiolus blossoms are a new triumph for flower growers.

## Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it strikes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Sassafras and see how quickly it will give relief.

Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Yes, sir, there in the pipe bowl is where tobacco does its stuff. And right there is where Ogden's Cut Plug shows itself to be downright good pipe tobacco. For Ogden's packs right, lights right and burns right... Cool, sweet and fragrant from beginning to end.

See if you don't agree that Ogden's is the tobacco for your pipe. Load the bowl and let the test begin.

## OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

## Pictures Made Of Cloth

Work Of Finnish Artist Resembles New Type Of Oil Painting

Pictures made of pieces of cloth chosen for their colors and stuck to a flat surface are on exhibit in Montreal, the work of a Finnish artist, Elia Meri-Kallio. There are landscapes, flower pictures and even a few figure subjects, in which scraps of woven stuffs have been used to produce the effect of flesh painting. Silk, muslin and all kinds of textiles are used and a great deal of patience and skill must have been required in working them into pictures to gain some striking effects which are quite surprisingly like many of the newest types of oil painting.

## Reproduces Natural Colors

Dr. Charles A. Tuzier, of Massachusetts Institute of Technology, has evolved a special process of reproducing natural colors of photographic objects on lantern slides. He has a set of slides illustrating geology, zoology, botany and anthropology taken in all parts of the world.

Farmers of the island of Jersey are joyful over prospects of the biggest potato crop in 13 years.

Some folks don't even like to get up to see the dawn of a new era.

## British Delegate At Geneva Stands Firm On Principle Of Protection To All Minorities

With a smashing indictment of the new German conception of race homogeneity Great Britain outspokenly opposed, at Geneva, the German argument that her treatment of the Jews does not come under the provisions of the rights of minorities.

W. G. A. Ormsby-Gore, controller of works and British delegate in the political commission of the league, was applauded by the members as he wagged his finger at Dr. Frederich von Koller, the German delegate, and declared:

"Wherever Jews have been in the course of the centuries, they have been the most loyal and helpful members of the nations. There is among the Jews a sense of historical continuity throughout their dispersal, and they do form a racial minority which deserves the same fair treatment as is extended to other loyal citizens of the nation to which they are attached."

The German argument is the Jews in Germany are neither a racial nor linguistic minority and therefore the minorities' treaties are not applicable. Dr. Von Koller answered the British attack by insisting the league has no competence in the matter; and it was a unique problem demanding special treatment. The Germans also have attacked the whole previous conception of nationalities by the new Hitler idea that a nation is an ethnic whole regardless of whether its members are within or without its frontiers.

The British delegate bluntly rejected this idea and did not mince his words. "If we accept it," he said, "I hesitate to think of the responsibility of any government for all those in the United States who claim descent from the original Pilgrims in the Mayflower." There are about 3,000,000.

Great Britain herself consists of three main races, the English, the Scottish and the Welsh, and these could be subdivided into many more, he said.

Playing what he called the German thesis that a state has the right to concern itself with the citizens of its race living in other countries he grew increasingly emphatic as he launched into one of the warmest defenses of the parliamentary system delivered in an international gathering since the advent of Fascism and Hitlerism.

"Great Britain believes firmly in a parliamentary system in which the minorities can carry their voice to the government and all sides must be heard before laws can be enacted. Likewise Great Britain believes in the freedom of the press."

"We have always set self-government even above good government," he also declared. "Great Britain will never abandon parliamentarism. The quality of freedom is the only thing that holds Great Britain—it is the free association of free peoples bound together by real guarantees that protect all minorities all over the world."

"One of the cardinal principles of the British Empire is that no person shall be deprived of the right to hold any post under the crown because of color, race or creed."

Meanwhile a German delegate told the economic commission of the assembly that some Jews had left Germany because of "their bad consciences."

The commission was discussing a Dutch resolution seeking creation of a special organization to find homes for Jewish refugees, a proposal supported by the French, Spanish, Danish, and Czech-Slovakian delegates. The German said he opposed any discussion of the Jewish question from a political standpoint. President Count de Wiart, of Belgium, began selection of a sub-committee to study the idea, remarking: "I suppose that in view of the German attitude Germany prefers not to be represented."

"You are right," the German replied.

### Airmen Had Cold Job

Owing to intense cold, the airmen photographing Mount Everest not only had to have their cameras, oxygen-tank, valves and clothing electrically heated, but even the glass in their goggles was kept warm by fine wires running through it.

W. N. U. 2016

### Sodium Sulphate Plant

Refining Plant To Be Erected North Of Maple Creek

Immediate erection of a sodium sulphate refining plant to cost \$150,000 at Inglebright Lake, 40 miles north of Maple Creek, will be undertaken by the Metallica and Non-Metallica, Limited, of Toronto, it is announced.

The first unit will be in operation within the next two months and will employ approximately 80 men. Ultimately this will be increased by 50 to 60.

The initial construction work which entails the expenditure of \$150,000 will be for the construction of a single unit utilizing an air expansion drying system. Ultimately the firm expects to enlarge their plant facilities to in excess of \$1,000,000.

According to U. T. Bartram, of Toronto, the sulphate deposits at Inglebright Lake are the largest property in the world, having 98.6 per cent. pure sodium.

### Winnipeg Newspaper Union

By Ruth Rogers

COLLARS THAT WILL MAKE YOU LOOK FEMININE AND GLAMOROUS SLEEVES WITH NEW INTEREST

Today's pattern offers many new ideas to change your last year's frock.

It includes four different type collars and four sleeve models.

As you already know, white bengaline and white satin collars are ultra-smart this season. Sporty woollens in checks or stripes are exceedingly voguish too in scarf collars as in style 2.

Your sleeve decidedly dates the newness of the frock. And why not be up-to-the-minute?

Style No. 549 will help you look 1935. It comes in sizes 14, 16, 18, 20 years, 34, 36 and 40 inches.

Price of pattern 30 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Flour Milling Industry

Holds Place Of Third Leading Industry In Dominion

The flour milling industry in Canada is now the third leading industry with pulp and paper holding first place followed by slaughtering and meat packing.

Canadian flour mills now have a capacity far beyond the requirements of the domestic markets. The home market uses only 41,750,000 bushels of wheat for its domestic flour requirements while the requirements of the Canadian flour mills averaged around 67,500,000 bushels for the past few years.

The development of Canadian flour mills is largely accredited to the abundance of readily available water-power. Few of the big milling plants are now dependent upon steam since water-driven electrical equipment has largely supplanted that means of operation.

Four milling is the oldest of all Canadian manufacturing industries and dates back to 1605 when the first permanent Canadian settlement was made by the French at Port Royal, now Annapolis, Nova Scotia.

The substantial export business in wheat and flour from Canada had its inception during the time of the Napoleonic wars in Europe.

### Dairying In Palestine

Higher Milk Yields Obtained In The Holy Land

In Palestine, renowned in ancient times as a country of herds and shepherds, the native types of cattle are being superseded by pedigree stock, from which steadily improving milk yields are being obtained, says the Dominion dairy and cold storage news letter. Ten years ago 600 cows of good strain gave 2,724 lbs. of milk per cow. Today there are 6,000 cows of improved breed with an average yield of 6,810 pounds per cow, while the total production from all sources including native cows, amounts to 27,240,000 lbs. Some settlements, notably Kiriat Anahim, showed an average milk yield of as much as 5,800 litres (13,166 lbs.) per cow.

### Japanese Are Patriotic

Rich And Poor Contribute Toward Military Funds

Military funds in Japan have been greatly expanded by patriotic contributions since the Manchurian trouble began and a large share of the money has come from school children and factory workers. Rich and poor alike have been encouraged to add to local funds for the purchase of guns, tanks, airplanes and other weapons for the army. Hardly a week goes by without a ceremonial presentation of an airplane by the manufacturer and workers of some large firm or of a machine gun mortar by the teaching staff and children of some school or a college. Recently every officer and man in the navy gave a month's pay toward national defence.

"Smile that way again," She blushed and dimpled. "Just as I thought you look like a chipmunk."

### SCOTT-PAINE'S SPEEDBOAT'S EFFORT RESEMBLES A COMET

Our picture, taken from an aeroplane, shows the remarkable effort created by Hubert Scott-Paine's speedboat, "Miss Britain III," as she tore through the sea at Poole Harbour to create a new record for the British sea mile. A few minutes after this picture was taken "Miss Britain" broke into flames and the engine was destroyed.

## The Prosperity Of Dominion Depends Upon Prosperity Of Farmers Of Western Canada

### Explodes Popular Belief

Sir Leonard Hill States Draughts Do Not Hurt You

Many popular beliefs regarding fresh air and health were exploded by Sir Leonard Hill in his presidential address to the Sanitary Inspectors' Association Conference at Clanton-on-Sea, England.

"Most people still think," said Sir Leonard, referring to ventilation, "that they are tired and made uncomfortable by want of oxygen and excess of carbonic acid in crowded rooms and that the smell of such a room betokens the presence of volatile poison."

"The discomfort in crowded rooms does not result from chemical vitiation of the air but from interference with the loss of body heat and the congestion of the nose and nasal sinuses reflexly produced in sensitive people by infra-red rays, these acting on the skin."

"Relief is obtained by fanning the air and so cooling the skin and this without making any change in the chemical purity of the air."

"The Black Hole of Calcutta measuring eighteen square feet, had two small windows. In this, in 1756, were confined 146 people. Nine hours later twenty-three individuals staggered out, the rest were dead."

We know now that all these people died not from suffocation through want of oxygen, but from heat stroke.

"We have read recently of some forty-three greyhounds travelling in a furniture van and twenty-four dying, and of three valuable leopards dying in their usual travelling boxes when exposed to the sun in hot weather."

"In place of prosecuting such cases the R.S.P.C.A. might be much better employed in teaching the public to know about the danger of heat stroke. The death of these animals was due to over-heating and not to suffocation, as was supposed at the inquiry."

Sir Leonard said we now know that the chill felt before the heat of fever, was not the cause of the fever but the shivering stage which ushered in infection.

And yet to this day children were mistakenly kept indoors in air polluted with microbes for fear of catching cold outside.

### Founder Of Silk Industry

Preparations were made at Canton, China, for the commemoration of Lu Chiu, the famous imperial concubine of Huang Ti emperor of Chi-n. Traditionally accepted as the founder of the silk industry, history records that she discovered over 4,000 years ago the art of rearing cocoons. Under the auspices of the Bureau for the improvement of Sericulture, the celebration was held on the seventh day of the Seventh Moon, which fell this year on August 27.—China Weekly Review.

The development of the west seemed based on the assumption that for all time Canada would produce and would be able to sell enormous quantities of wheat every year. This policy had resulted "in large carry-overs during the past few years, with the prospect of a substantial amount on hand at the end of the present crop year, notwithstanding a relatively light crop," says E. W. Beatty, president of the Canadian Pacific Railway.

"It is a debatable question, therefore," he continued, "whether we will not have to revise our plans for the west and not place such complete reliance on our ability to export our wheat, even though it is the finest wheat in the world and produced under present conditions at costs which are moderate."

"One thing stands out above all others when western conditions are being observed and that is that their prosperity depends upon the prosperity of the farmer, and this means fair prices for wheat, and also that upon this prosperity depends the prosperity of Canada. I have never known a period in our history where we were not prosperous if agricultural conditions and prices were satisfactory."

"It is usual for those who visit western Canada to return with a greater appreciation than ever of the optimism and courage of the people of that part of the country and my recent trip has only confirmed what others have so often commended," continued the railway president.

"Notwithstanding drought, frost and serious damage in some districts, done by grasshoppers, the farmers of Saskatchewan and Alberta still retain their buoyant view and the vacating of lands for those more favorably situated has not reached very large proportions. Direct relief in some portions of the country will again, unfortunately, be necessary during the coming winter, but this, if officially admitted, will be cheerfully given by the taxpayers of the Dominion."

### A Common Occurrence

Suicides From New York's Tall Buildings Are Frequent

High buildings exert a fatal fascination on people whose minds are turned to the idea of self-destruction. Suicides from tall structures are so common in New York as to be commonplace. In one year 134 people were killed by jumping off high buildings. It was in May, 1929, that for the first time on record a man committed suicide by jumping from the Statue of Liberty, the colossal figure in New York Harbor. The statue was a gift from France to the United States, and was unveiled in 1886. The height from the foundation of the pedestal to the torch is 305 feet. The Eiffel Tower, since it was built 40 years ago, has been the scene of 111 suicides. The tower of the Westminster Cathedral has brought on attacks of "height madness," and a few years ago a mother with two girls aged 7 and 2 were found dead after a fall of 250 feet.

### Creamery Butter

Figures Showing Percentage Of Production For Each Province

With respect to the total output of creamery butter in Canada in 1931 and 1932, the relative position of each province is shown in the following statement of percentages, the figures for 1931 being placed within brackets: Ontario, 35 (34) per cent.; Quebec, 30 (31) per cent.; Alberta, 10 (10) per cent.; Saskatchewan, 2 (3) per cent.; Manitoba, 9 (9) per cent.; Nova Scotia, 3 (3) per cent.; British Columbia, 2 (3) per cent.; and New Brunswick and Prince Edward Island each 1 (1) per cent.

### Looking For Passengers

Air-Commodore S. Charles Clifford Smith has announced in Wellington, N.Z., that he will fly his famous "plane," "Southern Cross," from New Zealand to England next fall if he can secure eight passengers. Two New Zealanders have booked seats with him at \$2,400 each.

## SOLID OPPOSITION TO RE-ARMING FOR GERMANY

Geneva, Switzerland.—Chancellor Adolf Hitler, of Germany, confronted with staunch opposition to re-arming from the United Kingdom, the United States and France, was forced into a position of deciding whether to accept transformation of the Reichswehr without immediate possession of war materials.

In a swift moving climax of the day's disarmament developments, the United States joined Great Britain and France in a united position against an increase of German arms.

It was revealed in French circles that the United States representative, Norman H. Davis, told Foreign Minister Paul-Boncour that American opposition to re-arming had become much clearer at Washington.

Indications were that slow but steady progress was being made toward a solution of disarmament problems despite difficulties still existing on practical points between France, Great Britain and the United States.

M. Paul-Boncour was immensely pleased at the American attitude. France has always been opposed to any German re-arming proposal. At a three-power parley, Great Britain through its foreign secretary, Sir John Simon, took a decisive stand in the same direction.

Indications continued that adjustments will be made in a spirit of conciliation which will satisfy Germany, cession the British Government is known to oppose allocation of military aeroplanes.

It appeared that the British position against re-arming had become even more rigid than that of the French.

### Rail Workers Warned

Must Not Wreck Machinery Of Industrial Disputes Act

Montreal, Que.—Warning that railway employees should take no action to wreck the machinery of the Industrial Disputes Act was given to members of the Brotherhood of Railroad and Steamship Clerks by Lynn B. Spencer, K.C., chairman of a board of conciliation appointed to hear a dispute between the brotherhood and the Canadian Pacific Railway.

The chairman's warning came after he had granted the request of Frank Hall, vice-president of the brotherhood, for postponement of the hearing. Negotiations between the running trades and the two Canadian roads made the postponement necessary, argued Mr. Hall.

### Had Clause Changed

Geneva, Switzerland.—Germany won a victory on the Jewish question in forcing the League of Nations Assembly to reject a clause in a resolution German delegates had aimed directly at their government's treatment of Jews. As adopted, the measure expressed the hope all countries regardless of whether they signed treaties relating to minority groups, should extend treaty benefits to their minorities.

### Landslide Buries Nineteen

Tegucigalpa, Honduras.—Official reports from a village 30 miles east of here said 19 persons were buried alive in a landslide which struck the village of Apolopi. The report said a portion of a hill descended upon the village. Many houses were destroyed. In the same district the Choloma river flooded houses and plantations, drowning some people and numerous cattle.

### Awarded Damages

Calgary, Alberta.—Lottie Cameron, of Lethbridge, was awarded \$1,000 damages from the City of Calgary by Mr. Justice J. R. Boyle, for injuries received when she slipped and fell at the intersection of two of Calgary's busiest streets last January.

### Cancer Cases Cured

Chicago.—Surgeons reported 12,746 cases of cancer have been cured in the last three years. Thirty-one specialists reported this progress in a symposium entitled "Cancer is Curable," sponsored by the American College of Surgeons.

W. N. U. 2016

## Better Understanding

U.S. Minister To Canada Speaks At Ottawa

Ottawa, Ont.—"I want no green baize cloth on our council tables and no jockeying for petty advantage," Hon. W. D. Robbins, United States minister to Canada, told the eighth annual convention of the Canadian Chamber of Commerce at the annual banquet of that body here. Mr. Robbins was one of the guest speakers, together with Hon. H. H. Stevens, Minister of Trade and Commerce.

The United States envoy assured his hearers he would do everything in his power to bring about complete understandings between Canada and the United States.

J. H. Woods, of Calgary, a past president of the chamber, voiced the appreciation of the gathering for the addresses.

The convention devoted several hours to an open discussion of ways and means by which government expenditures might be curtailed.

Three suggestions emerged from the discussion. One was that the national committee appointed last year at Halifax be allowed to continue its campaign of education for government economy.

Another was designed to establish a committee which would work with these various administrations for the purpose of eliminating duplication in their respective spheres, while a third was a straight resolution looking to the appointment of a small committee whose duty would be to prosecute a campaign for the lowering of government expenditures.

## Railway Wage Dispute

Believed Press Comment Not In Interest Of Either Side

Montreal, Que.—The interest of both sides would best be served if negotiations continued in camera and if no attempt was made by the press to gauge the tenor of the meetings, it was stated at the conclusion of recent negotiations between the Canadian Pacific and Canadian National Railways and the railroad running trades.

As far as could be learned the position is stationary, both the men and their employers persisting in their respective opinions. The union claim an additional 10 per cent. wage cut is unjustified; the companies that it is made necessary by adverse economic conditions affecting the roads.

While these negotiations were proceeding, the Brotherhood of Railway and Steamship Clerks made their submission to a board of conciliation in rebuttal to the case submitted some time ago by the Canadian Pacific Railway.

## "Royal Scot" Leaves Chicago

Starts On Tour Which Will Terminate In Montreal November 22

Chicago.—The "Royal Scot," England's crack train has headed for the west coast after having been viewed by more than 2,000,000 visitors at a Century of Progress Exposition.

It steamed out of the fair-grounds under its own power and was scheduled to depart from the Union Station for a tour that will take it to California and the Pacific northwest and back to Montreal, where it will be loaded on to a ship for its return voyage November 22.

## TO RETIRE

Dr. Frank T. Shutt, Chemist and Assistant Director of the Dominion Experimental Farm at Ottawa, who retires this month after more than forty-five years' association with the Experimental Farm.

## Huge Air Liner Wrecked

Caught Fire From Explosion And Seven Burned To Death

Chester, Ind.—The scattered bits of a giant twin-motor transport plane—one of its massive wheels hung suspended from a tree—was all that remained of a New York to Chicago ship of the United Air Lines that carried its seven occupants to a flaming death.

Just what happened when the all-metal ship with a top speed of more than three miles a minute crashed to earth in flames about five miles southeast of here, probably never will be known, but witnesses said they heard a terrific explosion.

Fives of the bodies were recovered, but none was taken out alive as the heat of the flames kept back farmers who flocked to the scene.

Due to the complete break-up of the plane and the wide area over which the wreckage was strewn, any attempt to discover the cause of the tragedy probably will be difficult, but officials of United Air Lines said they were launching an immediate and thorough investigation.

## U.S. Recovery Plan

Sir Josiah Stamp, British Economist, Says N.R.A. Not A Success

London, Eng.—Sir Josiah Stamp, the economist, claims that American production had fallen off despite efforts of the N.R.A., especially in the construction field.

He asserted some industries were showing no signs of improvement and that creation of public employment was a definite failure. He expressed the opinion that the N.R.A. was increasing costs but not purchasing power. He added:

"America might succeed in spite of herself because of her youth and vigor."

### Only Three Needed

Washington.—Repeal of prohibition in the United States swept into its final stage with every indication that the 18th amendment will be voted out of the constitution on Nov. 7. On that day six states will ballot on repeal. Approval by only three is needed to cancel the prohibition amendment.

## War In The Air

British Flying Boat Armed With Heavy Gun

Felixstowe, Eng.—The air ministry's base here harbored the first service aircraft in the world to be armed with a heavy gun firing high explosive shells.

First of four flying boats being built at Brough, Yorkshire, for the Royal Air Force, the machine was flown here on its maiden flight. In the war and later years aeroplanes were unable to carry anything heavier than a machine-gun, although heavy bombs, of course, have been standard equipment on bombers for many years.

The new machine's armament includes a gun capable of firing 15-pound shells, and three machine-guns, the whole installed on what is virtually a 17-ton flying gun platform travelling at 132 miles an hour.

The long-standing problem surmounted by the builders of the new aircraft was that of providing for the recoil upon an aeroplane of the heavy gun. Intensive trials will now be given the craft, after which, with the other of the quartette, it is expected to form a squadron to be stationed at Malta.

## Time Cut By Forty Hours

Kingsford-Smith Made Fast Trip From England To Australia

Wynham, Australia.—Wing Commander Sir Charles Kingsford-Smith clipped more than 40 hours from the England-Australia flying record when he landed here to the cheers of a mighty throng of welcomers.

The famous airman, hero of a Pacific crossing and numerous other flying feats, left England with the declaration that he was not out to set a new mark.

London, Eng.—The breaking of the England-to-Australia flight record by Sir Charles Kingsford-Smith was such important news in London that it dwarfed such matters as war debts and disarmament.

News of the Australian's success was wired to Sandringham for the information of the king, who has taken a keen interest in the flight.

## Visible Wheat Supply

Heavy Increase Shown Over This Date Last Year

Ottawa, Ont.—Canadian elevators bulged with 235,170,472 bushels of wheat on October 6, it was reported by the Dominion Bureau of Statistics. This was an increase of 7,655,939 bushels from the previous week. A year ago, the visible supply was 210,932,689 bushels.

Canadian wheat stored in the United States consisted of 6,541,114 bushels, compared with 11,028,622 bushels a year ago. Wheat in transit on the Great Lakes consisted of 5,290,618 bushels, compared with 6,082,030 bushels last year.

United States wheat in Canada was shown as 2,991,168 bushels, compared with 8,518,062 bushels last year.

### More Cold Storage Foods

Ottawa, Ont.—With the exception of eggs, pork, fish and apples, all food commodities in cold storage on Oct. 1 showed an increase over the corresponding period last year, the Dominion Bureau of Statistics announces.

## DEFINITE SIGNS OF ECONOMIC RECOVERY NOTED

Ottawa, Ont.—Reduced taxation and sound financial policies are the only means of lightening Canada's present burden and of bringing about an era of balanced budgets, J. MacLeod Clarke, secretary of the Canadian Chamber of Commerce, told the eighth annual convention of that organization. His report noted with satisfaction that federal and provincial budgets had been reduced in the current fiscal year by some \$50,000,000.

The secretary reiterated the chamber's willingness to assist the government in the selection of a personnel for a national committee along the lines of the May committee in the United Kingdom to bring about necessary reductions in governmental expenditures.

With regard to unemployment insurance, the recommendation was that the Chamber take no further action in the matter "other than to watch and secure any legislation which may be proposed to this end, with a view to assisting in the drafting of laws which will be sane and sensible."

Fire losses were reduced in 1932 from 1931 and a helpful sign was that in the last year 55 per cent of the losses were covered by insurance, an increase of eight per cent over the previous two years.

Thirty-five boards or chambers took part last year in the contest to prevent fire prospects held by the Canadian Chamber of Commerce. For cities over 50,000, Toronto won the silver shield. Kenora, Ont., was winner for cities under 15,000, with Prince Albert, Sask., second.

Increasing interest was also shown in the report submitted to the convention for the health and safety content. Winnipeg won the class one for cities of over 50,000 population and Vancouver second.

Slow return to normal economic conditions is being reflected in the greater confidence and more hopeful outlook of the Canadian people, said A. O. Dawson, executive chairman of the board.

It was a "definite improvement which has in the main been sustained," said Mr. Dawson, possibly the most important feature of the recovery being the narrowing gap between Canadian farm products and the prices of manufactured goods.

Manufacturing activity has been quickened. Iron production made some progress during the second quarter of the year, while producers of automobiles, textiles and boots and shoes have been "extremely active" and more favorable markets are now looming in the United States and in the United Kingdom for our new products.

The unemployment situation had been bettered to the extent of 200,000 formerly idle men finding employment since April.

Evidence of improving foreign trade was noted by Mr. Dawson in the fact Canada had recovered fifth place among the world's exporters.

Mr. Dawson listed "some of the problems that still press us," as follows: Taxation weighing heavily on business, an unsatisfactory railway situation, farmers' dissatisfaction with meagre returns for long hours and hard work, unsatisfactory wages to industrial workers "which must surely lead to trouble," and curtailment of church, hospital, educational and charitable activities as a result of curtailed revenue.

The importance of conditions in foreign lands should not be overlooked, continued Mr. Dawson. Definite advancement on the road to normalcy was evident in the United Kingdom and the international co-operation brought to bear recently toward the solution of the wheat problem had aroused hope that "international agreement may be extended to other natural commodities in the near future."

### Want To Settle

Calgary, Alberta.—Aetna Life Insurance Company, Hartford, Conn., holders of \$100,000 of city of Calgary bonds on which Calgary refused to pay New York exchange upon maturity last January, has made overtures for settlement at current lower exchange rates. It was disclosed by Mayor Andrew Dawson.

"PLANES VERSUS WARSHIPS"—SCENE FROM THE "WAR ZONE"

This impressive photograph was taken from an aeroplane above the clouds, looking down on an incident in the British aerial-naval maneuvers that took place recently off the Firth of Forth. The Royal Air Force attacked the British Navy and interesting "battles" resulted. Looking through the clouds a warship can be seen, while hidden from it by clouds hovers a bombing squadron.

### A HELP TO THE DRIVER

There may have been some amusement among the uninitiated when manufacturers began to bring out new car models equipped with relatively large speedometer dials, a year or more ago. Experience has taught many drivers in the interim that the innovation was of noteworthy advantage to them. The longer needle has the effect of rendering the instrument more sensitive. Its fluctuations are more readily noticed by the driver. The resultant tendency is for him to drive more steadily.

### PUNISHMENT VS. EDUCATION.

Thirty traffic violators in one morning. Thirtieth suspended sentences. The cause of highway safety further ahead than if everyone had been fined. At least, so it would appear when a New York magistrate adjourned his Court and took the whole crowd of offenders to a nearby street corner, where a traffic policeman explained the right way and the wrong way of negotiating an intersection. To clinch the matter, the magistrate explained that the object of the Court was not to send people to jail nor to collect fines, but to improve traffic conditions; thereby creating 30 new safe driving missionaries.

### MORTGAGE SALE OF FARM PROPERTY.

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act" under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Post Office, in the Village of Stony Plain, in the Province of Alberta, on

**Sat'day, the 28th October, 1933**  
at the hour of 2.30 o'clock in the afternoon, the following property, namely:

The North East Quarter of Section 12, Township 53, Range 1, West of the 5th Meridian, containing 100 acres, more or less, excepting those portions described in Certificates of Title No. 6301 and No. 35 E 33, containing 4 acres, more or less, and excepting 1.19 acres for road as shown on Plan 2679 Y, excepting thereout all mines and minerals, and

The East Half of Section 13, in said Township and Range, containing 320 acres, more or less, excepting thereout of the South East Quarter, 1 acre, more or less, as described in Certificate of Title No. 111 G 12.

Terms of sale to be ten per cent. cash at the time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserved bid and free from all encumbrances, save taxes for the current year.

The vendor is informed that the above property is situated about 2 1/2 miles from Stony Plain, at which point is the nearest post office and elevator. The nearest school is approximately 1 mile from the land. The soil is a chocolate loam with a clay subsoil.

The land contains approximately 475 acres of which approximately 325 acres have been under cultivation. An additional 125 acres could be broken. There is a creek running through the property and also one good well. The land is fenced with three strands of barbed wire.

The following buildings are on the land: 6 room, 2 storey frame house with shingled roof, 2 frame granaries, 1 log granary, 2 log barns, log granary and hog house.

For further particulars and conditions of sale, apply to Messrs. Newell, Lindsay, Emery & Ford, Barristers, Canada Permanent Building, Edmonton, Alberta.

Dated at Edmonton, in the Province of Alberta, this 11th day of September, 1933.

"A. T. KINNAIRD", Dep. Registrar

## OCCASIONAL WIFE

by EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

### SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to the Peter down when he has so much promise as a sculptor. At an art school dance, Gus Malson, Peter's roommate, who is jealous of Peter's success, takes Camilla out on the lawn to tell her something she should know about Peter.

(Now Go On With The Story)

### CHAPTER XIII.

"Well," began Gus, exhaling the smoke of his cigarette, noisily, and turning toward Camilla. "You sure do get to know a guy when you live with him. And I'm telling you now that Peter is not good enough for a sweet little kid like you. He has a dozen skirts after him all the time, like the moths around that light over there. Why? Because he kids 'em along and makes each one think she's the berries for him. D'you know how he's payin' his way through school? On the money he gets from rich dames like you! Has he touched you for a payment yet?"

"You are despicable," Camilla told him in a deadly calm voice. "I don't believe a word you are saying and I refuse to listen any longer!"

"Oh, yeah?" his laugh was ugly. "I'll bet you are beautiful to look at when you're mad like that. I told you I'm crazy about you and I meant it. If Peter is good enough for you, so am I—" and before Camilla was aware of what was happening, his arms were holding her like a vice and his mouth was seeking her while she struggled violently to free herself.

From behind them, a doubted hand struck out swiftly against the side of Gus' head and sent him sprawling upon the ground. At the same time, another arm grasped Camilla's shoulders and prevented her falling from the force of the blow that separated them.

"Did he hurt you, dear?" Peter was breathing hard, with anger and exertion.

"No, but I hope you have hurt

him." She was trembling, too, with anger. "Not because of me but for what he was saying about you."

"I heard enough," Peter said curtly, "which doesn't matter." But I'm sorry I am responsible for introducing you to such a bum."

He walked around the bench and stood above Gus, who rolled over then and put his hand tentatively to his bruised jaw. Peter assured himself that his victim was only stunned, stood up and adjusted his own tie and clothes, and took Camilla's arm.

"Shall we go back to the party and forget this unfortunate affair? Glad I came out here to look for you. I missed you and had already lost one dance with you, so I suspected something was wrong." He was trying to dismiss the incident and sound casual, but his voice still shook uncertainly. "I know you wouldn't voluntarily cut the dances you had promised me."

"But, Peter, he said those terrible things about you!" She was still trembling with her own resentment, and wondered how Peter could dismiss the thing so calmly.

"But you don't believe them, darling!" He asked quietly.

"Of course not!"

"Then, that's all that matters. You know, the world has so many people in it that there just have to be some like that—ungrateful and jealous and malicious. But time is too precious to waste, even thinking about them. From now on, we'll just forget Gus. People like that just hang themselves with their own rope. He can shift for himself, as he did before I took pity on him. At least, that's one load off my mind!"

**AFTER 50**

RICH IN VITAMINE

air is sweetly caressing and the sounds of the night whisper and echo mysteriously like conspirators of romance. The moonlight stretched a silver path across the lagoon, down which tiny ripples rode gleefully with the breeze. Somewhere, a pair of birds had just finished the building of their nest and twittered sleepily, and an adventurous frog gave a frightened croak and leaped into the water with a thudding splash.

Camilla chuckled softly. "Poor thing! Perhaps he was on his way to see his girl friend and we frightened him so he never will have the courage to try again."

"Too late, anyway, to start out adventuring," Peter laughed. "He should be taking her home, as I am—and wish I didn't have to," he added softly, drawing her closer with the arm that held her.

Peter was Breathing Hard From Anger And Exertion.

"Do you mean," Camilla was incredulous, "that you have been keeping it?"

"Most of the time, he shrugged indifferently.

"And he could say that!" she exclaimed with dismay. "Well, this world surprises me a little more every day—the people, I mean."

"Sure, the world is fine. It's the people—regular hodge-podge. Interesting, though," he added thoughtfully. "Every good or bad surprise I have over human nature makes me feel a little bit wiser and more able to cope with it in general. As Tennyson said, 'I am a part of all that I have met.'"

"Oh, Peter, you're so fine yourself," she told him with loving admiration, "that you can find some good in everything."

He pressed her hand that was tucked into his arm, as they walked slowly back to the auditorium. "That's because you think so, honey," he told her with characteristic modesty.

The last balloon had escaped ceilingward, many of them were deflated and had dropped to the floor—which was strewn with confetti, serpentine dangled lumpy in mid-air, and the orchestra had crooned goodnight.

Again, they were waking through the park, arm in arm. It was that witching hour when the young moon rides high and gloriously, when the

"You don't wish that more than I do, Peter?"

"Precious! But that's not the worst of it. Lord knows how many more years I'll have to be taking you home and leaving you forlornly."

"Not years, darling?"

"It will be, unless things happen a lot faster than I have any right to expect."

"But why do things have to happen—before we can have each other?"

"So I'll be able to take care of you, of course. Sometimes, he sighed heavily, "I'm afraid that never will be."

"Why, you dear, foolish thing, you

**Sure Signs**  
of kidney troubles are pain in the back, difficult urination, deposits in urine. Giv Pills relieve kidney trouble by gently soothing and healing the inflamed tissues. 50c a box at all druggists.

talk as if I were going to be a burden to you."

"Never that!" he protested. "But, you know—"

"I know nothing about letting you take care of me, Peter, this is the day of women's freedom, you know, freedom from the bonds of idleness that makes them burdens to men. You don't have to take care of me, just because you love me."

"And that is just why I do want to take care of you. That is the test of a man's love, whether or not he wants to cherish and protect a woman. It's all right for women to be free and independent—free to escape from the guardianship of men if they wish. But when a woman falls in love, she goes right back to the beginning of things again—service and subordination and dependence. She can't escape it. And the man who loves her in the right way, wants to take care of her, to endow her with his worldly goods. It is part of his vanity."

"Of course, but all of that is in our future, dear, and for people whose situation is different from ours. I'm talking about us now. Why should you grieve and worry over not being able to provide for me, when you should be giving the best of yourself to your work toward success?"

"But what else can I do?" Now that I've found the you, I can't forget you—not for a minute. Oh, Camilla, I need you so—"

He stopped abruptly to kiss her. "How can we go on like this—for years?" his voice yearned.

"We can't," she whispered, "and we'll not."

"What do you mean?" he demanded.

(To Be Continued.)

## Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men."—Galatians 6:10.

I ask Thee for a thoughtful love, Through constant watching-wisdom, To meet the glad with joyful smiles, And to wipe the weeping eyes, And a heart at leisure with itself, To soothe and sympathize.

—A. L. Waring.

Surely none are so full of cares or so poor in gifts that to them also, waiting patiently and trustfully on God for His daily commands, He will not give direct ministry for him, increasing according to their strength and desire. There is so much to be set right in the world, there are so many to be led and helped and comforted, that we must continually come in contact with such in our daily life. Let us only take care that by the glance being turned inward or striding onward we do not miss our turn of service, and pass by those to whom we might have been sent on an errand straight from God.—B. Charles.

Look up and not down, look forward and not back, look out and not in, and lend a hand.—Edward B. Hale.

## One Of Queerest Trades

Professional Writer Of Speeches Has Office In London's Famous Strand

Entitled to a high place on the membership list of the club of queer trades is surely the professional writer of speeches who occupies a skyrocketed office in London's famous Strand. His enterprise and originality have at all events brought him success, for since his idea was first put into practice, a few years ago, he has written hundreds of speeches on the most diverse subjects, titled and professional folks of all sorts apply to him. For the most part, however, his clients' requirements are of a more ordinary nature, and consist of demands for after-dinner speeches, and addresses for banquets, presentations and similar functions. The writing of political speeches at times also forms a considerable part of the humble speech-writer's activities; and on many occasions he has been called upon to write both "for" and "against" the same party and subject.

## Pigeon Bought First Aid

When lost in a fog a pigeon took refuge on a ledge in the City of Blacky in an exhausted condition. The owner lost hope of recovering it, but a few days later it came back with a message tied to it which told him that it had been fed and cared for.

## CHICKEN SHORTCAKE

2 cups pastry flour  
(or 1 1/2 cups of bread flour)  
3 teaspoons Magic Baking Powder  
1/2 teaspoon salt  
4 tablespoons shortening  
1 egg 1/2 cup water

Sift dry ingredients; add shortening and mix in thoroughly with a steel fork; add beaten egg and sufficient water to make soft dough. Roll out on greased board. Cut out with large round, biscuit cutter, or half fill gassed muffin rings which have been placed on greased baking pan. Bake in hot oven at 475° F. about 12 minutes. Split and butter while hot, and fill with hot creamed chicken. Makes 6 shortcakes.

Try Miss Alice Moir's light, flaky

## Chicken Shortcake

"I always use Magic Baking Powder," says Miss Alice Moir, Dietician of one of Montreal's finest apartment-hotel restaurants. "Magic combines efficiency and economy to the highest degree. Besides, it always gives dependable results."

In whole-hearted agreement with Miss Moir, the majority of Canadian dietitians and cookery teachers use Magic exclusively. And 3 out of 4 Canadian housewives use Magic because it gives consistently better baking results.

No wonder Magic outsells all other baking powders combined!

Favour your family with Chicken Shortcake—made with Magic as Miss Moir directs. Note its delicate flavour, its feather lightness!

**Free Cook Book**—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

Cigarettes produced in Egypt in the last year are estimated at nearly 5,000,000,000.

Improved economic conditions are inspiring farmers in Peru to plant more cotton.

### Holborn Happenings.

An auction sale, will be held in this district next week, that is on Friday Oct. 27th. This sale is being given by Karl Drassael, who has occupied the old Kimmery ranch on the river bank for several years. Mr. Drassael is making a clean-up of his entire holdings on the day stated; and these include about 10 horses, 6 head of cattle, his farming machinery, household goods, etc. The sale will be conducted by the old, reliable auctioneer, Mike Zucht. There will be no reserve, as it is Mr. Drassael's intention to sell everything on the premises he owns.

### The Nifty Harness-maker.

In view of the fact that the Alberta Legislature has, so far, neglected to pass a measure regarding rear lights on horse-drawn vehicles using the highways at night, the matter had been thought to let rest there until the legislators had changed their minds. But along comes a harness-maker with a new safety-first idea for the farmer who drives horses along country roads after dark. This inventor builds red reflectors right into the top of bridles or attaches them by leather pads to old harness. He points to the fact that the nodding heads of the horses give action to the reflectors, to the greater safety of drivers of horse-drawn vehicles at night.

### The Sun's Calendar.

Oct. 21—F F Schultz's sale.  
23—Louis Schoep's sale.  
26—E O Burt's sale.  
27—Boxing, Wrestling, Dance, New Ukrainian Hall, Carvel Corner.  
27—Dance, Warden School.  
27—K Drassael's sale.  
30—Chicken Supper, Moose Hall.  
31—Dance at Muir Lake and Brightbank.  
Nov. 4—Tax sale, Stony Plain.

### Boxing, Wrestling, Dance.

It takes a very enterprising sports promoter and one quite sure of his audience, to hang up such a bill for an evening's entertainment as Andy Brass presents for Friday, October 27th at the New Ukrainian hall, near Carvel Corner, under the auspices of Duffield Athletic club.

The Duffield club is noted for the good cards it offers, when appealing for the patronage of sportsmen in the surrounding districts, and has rarely, if ever, fallen down on its entries when the time arrives for the gladiators to enter the squared circle. This is more than can be said for the shows staged, at times, in Edmonton.

Following the wrestling and boxing, there, will be a dance, for which a good orchestra has been provided. The dance floor in the new hall is one of the best.

### Junior Club Contests.

The annual provincial five stock club contests to decide upon the junior club teams to represent the province in the nation-wide judging contest at Toronto royal fair this fall, will be held at Edmonton, November 1. Teams will compete from Lethbridge on the south to as far north as Spirit River in the Peace River district.

Dance, Warden Schoolhouse, Friday, October 27th.  
"Snappy Four" Orchestra.  
Admission, :: 35 Cents.

### Stony Plain and District

Mr Carl Petersen is having his Velie truck rebuilt, and will shortly be offering to haul your stock and produce to market.

Mr Chas. Ries arrived this week from Vernon with a car load of choice fruit.

Messrs W Britain and R Magwood, Onoway, were in Stony Monday, on a purchasing trip.

The Catcosh School in connection with St Matthew's church (Missouri Synod) opened its sessions on Monday morning, with Rev E Eberhardt in charge.

Work has commenced on the re-graveling of the Town road from Tony's corner to Mike's Curve, at the High way.

Tuesday's passenger train from the East was 70 mins. late.

Several of the local elevators have had lightning rods and conductors installed on them this week.

There was a slight change to the usual runaway stunt in Stony on Tuesday when a green coupe ran over the sidewalk on Main St. and crashed into Christy's confectionery window. Jim was able to get the number of the car, which appeared to be "Alta 22 408." This car is said to have been noticed at Edmonton Beach during the past summer.

The sale is reported of the Adolf Krenz quarter-section on 38, 53, 1 w5, to Mr Aleck Brauer. Mr Krenz is said to be moving in a short time to the Edmonton Beach district, and will resume farming operations.

### Spruce Grove News

The Rural High School held its regular business meeting on Friday Oct. 6; Margaret Bates took the chair.

Andrew Schwindt was elected captain of the girls' softball team.

Three senior girls delivered short speeches.

Lydia Schutz—Calendar reform in which she demonstrated how difficulties in our calendar might be overcome.

Christie Groat—Railroad Transformation; wherein was shown how our railways might be adapted to compete with hard road traffic.

Margaret Bates—Andrew Carnegie; being an interesting biography of this remarkable Scot.

A ballot box containing suggestions for a name to the club resulted in "Grove Jun for Sport Club" being chosen.  
—C. G.

Members of St. Joseph's Parish are arranging to hold the annual chicken supper on a date shortly to be set.

Mr Joe Whitelock was up in Stony on Friday last, renewing old friendships.

Sale, Louis Schoep's farm, Mon., Oct. 23. Horses, cattle, implements. No reserve.

### Bridge Probe Needed.

We fondly hope that the next commission to start on a tour of Canada, will be one devoted to contact bridge, says the Hanns Herald. We have yet to find out the proper card to lead when your poker-faced partner has not opened his yap with a single bid and the "rule of seven" is still a deep, dark mystery.

### We Noticed This Week.

"Harold the Hookyist" making a Preparedness address in front of Eggbert Hall.

"Three O'clock" John heading for the bank at 2:58 1/2.

"Frijole" motoring up the Main stem in his one-barrel chariot.

Our new barber, Mr Coleman, heading for his hair-dressing parlor next Bill's Pool-hall.

### On the Side.

What's called a numerous few were present at the meeting of the Chair warmers' club, and, of all things on this terrestrial ball, the subject of golf came up. And, like all things which lead to great wars, this started in quite an innocent way—someone asked Bill McGann why he was wearing his daddy's cut-down golf breaks. Bill says: "Yer don't know what golf is; and Misk says golf is 7 10ths peripatation and 3 10ths transportation, but yer can't tell me why a golf ball is dented; Yes, sez Bill, I can; originally golf balls were made of leather stuffed with feathers. After some time, however, the manufacturers started to make 'em of gutta percha; but they made 'em smooth and not like those you see today; after a time it was noticed that the balls went a very much longer distance and speeded thru the air in a much straighter line after they had been dented by the iron clubs in the course of play. The makers began to dent the balls by hand, and then, in time special machinery was introduced by which the balls were moulded into the various patterns we are accustomed to see today.

"We ain't got nothing on the Irish, when it comes to doing business," says an Eastern paper. "Pay Cash" is the slogan of a campaign recently started in Irish Free State which is reported to be bringing money out of hoarding. In Dublin merchants have these signs posted: "We don't cash checks—not even good ones" and "We don't give credit—not even for your good intentions."

"The Typographical Journal" Edited by the daughter of a Methodist minister, the respected Police Gazette has made its reappearance in print, pictures and all. Who may now contend that we are not living in a modern age?

"Human beings, scientists find, are gradually becoming smaller." "So is our bank account," says the Edson Signal.

### New Mail Schedule.

From the East, and to West—Sun, Tues. and Thurs at 1:37 p.m.

From the West and to East—Sun, Wed. and Fri. at 8:01 p.m. Mail for despatch to East should be posted before 7 p.m. and for West before 10 p.m.

Reg. dispatched and received with every mail.

### Horsepower Tax Old Stuff.

Horsepower tax is no new thing in England, its roots have been traced back to the Norman Conquest, and in Oakham, seat of England's smallest county, is a unique exhibit to convince the skeptical. It consists of more than 200 horsepoes, which almost cover the walls of Oakham Castle. For several centuries every nobleman passing through the town has to pay a toll (or tax) of one horsehoe; a custom which antedated Queen Elizabeth at least, because the shoe given by the Virgin Queen may be viewed along with the contributions from Lord Trent and the present Prince of Wales. Some of the shoes are the real thing, taken from warhorses of hunters, but the majority are models varying in size up to six feet high. With today's wheeled traffic it is perhaps fortunate for the traveller that the tax is fixed at one shoe per nobleman and not one shoe per "horse."

### The "MONCTON" Winter Outdoor Boot

The cold-proof Boot for all outdoor work or sport—heavy felt top with rubber sole and heel.

"A Rubber for Every Purpose"

LOOK FOR THE TRADE MARK

THE NORTHERN RUBBER CO. LIMITED

A complete range of "Northern" Boots and Rubbers in hand to meet your needs—
